EDUCATION

National University of Singapore *B.Sc. Business Analytics (Computing), Hons.*

Aug 2023 – May 2027

- NUS College (Honours College) | Lim Hong Chin Memorial Scholarship Recipient
- Specialization: Machine Learning-based Analytics | Second Major: Quantitative Finance

EXPERIENCE

Government Technology Agency (GovTech) Singapore *Data Scientist Intern*

Jan 2026 – Jul 2026

- Built an AI-powered **RAG system** — an adaptive RFI/audit-question generator and **QA agent** — for government IT security auditors, grounding outputs in **IM8 policies** and historical findings across **12+ audit domains**; cut question-drafting time **~85%** (**~65 man-days/year**) with **100% traceable** reasoning via a multi-agent challenge-response framework
- Developed **5+ Databricks apps**, interactive dashboards, and **Python-SQL ETL pipelines** to surface audit insights from large government datasets for auditors
- Engineered an **internal team tool** that auto-generates technical documentation using GitHub's **Spec-Driven Development Kit**, cutting manual write-up effort across the team

World Technologies *Automation & Tech Intern*

Sept 2025 – Present

- Designing and prototyping **agentic AI marketing systems** that automate a previously manual lead-generation and outreach workflow, projected to save **~10 hrs/week**
- Independently built and shipped a **company website end-to-end** (<https://innovationasialab.com/>) owning the full stack for this B2B industrial startup

Ernst & Young (EY) *Business Analyst Intern*

May 2025 – Sep 2025

- Contributed to **Microsoft Dynamics 365 CRM implementation project** during user story and requirements finalisation; built **5 Tableau dashboards** saving **15%** of time for manually creating management reports
- Automated **Python-SQL pipelines** consolidating **1M+ customer records** for a national gaming operator, cutting reporting time **15%**
- Drove **200+ action items** via daily client standups, collaborating across functional, technical, and data-migration teams and stakeholders

Yale-NUS Consulting Group *Associate Consultant*

Jan 2025 – May 2025

- Delivered pricing and product strategy for a plant-based beverage client across **6 SEA markets**; built Python clustering models segmenting **3 high-potential consumer groups** and authored a market-entry plan projected to lift **Y1 revenue 15%**

ENTREPRENEURSHIP & PROJECTS

Project Bambubuyog *Co-Founder & Head of Technology*

Nov 2024 – Present

- Co-founded and incorporated a social venture building a **marketplace** for stingless-bee honey and bamboo beehives, empowering **50+ rural farmers** in Palawan; now **expanding into Indonesia and Cambodia**
- Raised **\$50k+ in investment & incubation** across 3 panels; led a 5-member team building the platform (marketing, logistics, data tracking) and engaged 10+ farmers, NGOs, and restaurants on pilot distribution

Internship Recruitment Platform

May 2025

- Shipped a sentiment-based internship-review product built with **Vue.js** and **JavaScript**, **adopted by 50+ students**; **AI/NLP-based sentiment analysis** generated **20+ employer scorecards**

GIC Financial Transactions Dashboard *Python · Streamlit · Plotly*

Oct 2025

- Built an interactive Streamlit dashboard in Python over **10,000+ transactions**, featuring **6+ dynamic Plotly charts** and **2 ML models (IQR, Isolation Forest)** for anomaly detection

TECHNICAL SKILLS

Languages: Python, SQL (MySQL/NoSQL), R, Java, JavaScript, HTML/CSS

ML & AI: Pandas, NumPy, scikit-learn, RAG & LLM systems, multi-agent frameworks, vector databases, prompt engineering

Data & Tools: Databricks, ETL pipelines, Tableau, Streamlit, Plotly, Git, Agile | **Spoken:** English, Hindi
